## EXPERIENCE

Developer

### Fremtind Forsikring AS

2022 - Present Oslo, Norway

- Currently architecting and building an application for a new segment in the business market.
- Collaborated as one of two front-end developers, responsible for maintaining Fremtind's business market applications.
- Oversaw and guided the 2023 summer interns at Fremtind in their roles.
- Designed and built the 2023 Fremtind JavaZone stand, featuring a fun whack-a mole game that depended on the players' ability to control their heart rate for a chance at a better score.

Contract Senior JavaScript Engineer

### 10up Inc. - Google LLC.

2022 Remote

Contracted to work on Google Site Kit, a React based WordPress plugin with over 2 million active installations.

Developer

### Dekode Interaktiv AS

2020 - 2022 Oslo, Norway

- Started off as a developer trainee in a 12-month program, that was cut short in less than six months, due to good performance.
- Created internal tools for bootstrapping of WordPress blocks and projects, that took a manual process of 30 minutes down to under a minute.
- Worked at the team responsible for developing and maintaining T2, Dekodes internal block library.

Various Roles

2016 - 2020

Vast experience in sales and construction from various companies, in fields such as government grant consultancies, construction staffing and IT.

## TECH STACK

React	TypeScript	JavaScript	PHP	Node	
Relational Databases	Github Actions	NoSQL Databases	CMS		
Next.js	a11y	AWS	Jest	Playwright	Vue

## LANGUAGES

Norwegian Native	●●●●●	Polish Native	●●●●●
English Proficient	●●●●○		

## EDUCATION

Digital Marketing

### Noroff School of Technology and Digital Media

2019 - 2019

## SUMMARY

I love to architect and work on scalable, accessible and maintainable projects. The bulk of my experience is in a React, TypeScript and Node.js stack, but I love to branch out, and learn new technologies.

## ASK ME ABOUT

How I learned to code

I would love to tell you about my journey of how my love of computers turned into a career change.

Fremtind Summer Internship program

2023

At Fremtind Forsikring, I led a summer internship program that united talented students from schools all across Norway. Over two months, I mentored a team of 8 students, equally divided between developers and designers, as we worked on a challenging, yet doable project.

Beyond supervision, I organized workshops and presentations on essential topics like accessibility, systems design, software architecture, and best practices. To keep things lively and fun, I introduced 'mandatory' ice cream breaks, ping-pong tournaments and mini-golf outings. Additionally, I provided continuous guidance to keep our daily work on track.

The most rewarding aspect was the students' feedback. They were pleased with the knowledge and skills they gained during their internship, and their positive reviews of my leadership highlighted the success of our collaborative effort.

Google LLC. - Google Site Kit

2022

Google's official WordPress plugin, providing insights on Analytics, Tag Manager, AdSense and more.

I got brought onto this project as a senior JavaScript engineer, and my day-to-day consisted of writing implementation briefs, to help the engineer executing tickets with solving them, solving issues in the project, as well as preparing them for hand off to QA.

Nasjonalbiblioteket - N-gram

2021

React application for displaying the usage and relation of words in the languages of Norway. The application parses data from an API built based on the Norwegian corpus, and displays it in a series of graphs. The goal of the project was to create a user-friendly way to explore the languages used in Norway.

I was the responsible engineer on this project, bringing it all the way from the estimating and planning phase, until client hand off.

- Graph implementation using D3
- Serializing algorithm for client side URL-shortening
- Options for embedding the graphs
